Installation time appr.	from 2 hours

* depending on nozzles

** two presets, custom possible

*** Q1 mini single / Q1 mini double

Q1 as standard is 2.30 meters high.

Q1 mini, which is a variant without tank designed to be connected to a water supply is only 82 cm high in the double version. Shall one space be protected, you can get the device with a flat top and a total height of 52 cm which makes a hidden installation possible.

Do you have other requests for adjustments, you are welcome with inquiries.

Examples of items that we have protected with custom units:

- Street kitchen, kitchen and public area
- Protection of lithium batteries on a electric powered fishing boat
- Protection of a paper saw at a paper industry
